

↳ What is Programming?

Just like we use ^{hindi} or English to communicate with each other, we use a programming language like Python to communicate with the computer. Programming is a way to instruct the computer to perform various task.

↳ What is Python?

Python is a simple and easy to understand language which feels like reading simple english. The code nature of Python makes it easy to learn and understandable by beginners.

★ Father of Python → Guido van Rossum, created Python in 20 feb, 1991.

16 Oct. 2000, को Python-II release की गयी इसके कुछ disadvantage को मद्देनजर रखते हुए 3 december 2008 में Python-III की release किया गया

जो Guido van Rossum थे, वह Monty Python's circus नाम का show देख रहे थे और उस show को देखते-देखते हुए जब language का नाम रखने की सोची तो उन्होंने show से inspire होते हुए इसका नाम Python रखा।

↳ Feature of Python

① Easy to understand = less development time

② High level language

③ Portable → Works on linux/windows/mac

④ free & open source
